Who converts, and are they our ICP?

The marketing email database and the two ways people convert, checked against the 2024 ICP. **JTP Contact us**: type of profile, original source and job title. **Content downloads**: RFI type of profile and original source.

Most people who convert are not our ICP: 79% of JTP contacts are startups, and corporates with 10,000+ employees are only 2.0% of JTP and 6.4% of content contacts.

The ones we do reach convert: corporates with 10,000+ employees get a deal about 10 times more often than the average JTP contact (5.3% vs 0.5%) and 5 times more often among content downloaders (4.7% vs 1.0%).

PEOPLE WHO CONVERTED

24,976

11,881 JTP Contact us · 13,385 content downloads · 290 did both

CORPORATES 10,000+

of JTP · of content contacts (243 · 853 people)

STARTUPS IN JTP CONTACT US

79%

9,410 of 11,881 chose "startup"

NO JOB TITLE

67% · 83%

of JTP · of content contacts: the ICP role can't be checked

What's flagged

- **The email database is large and mostly unknown.** 590,458 marketing contacts; 86% opened or clicked no email in 12 months. Only 5.8% of all contacts answered the profile question.
- **JTP Contact us is a startup door.** 9,410 of 11,881 contacts (79%) chose startup; corporates are 9.7% and governments 3.2%.
- **Content reaches more corporates, plus a lot of noise.** 21% chose corporate, but 5,578 (42%) chose Other, Job seeker or Student.
- **Paid social brings volume, few buyers.** 61% of content contacts came from paid social, with fewer than 5 deals; 40.5% of JTP paid-social contacts were disqualified by sales.

What's working

- **Large corporates convert.** JTP: 17.7% qualified by sales and 5.3% with a deal. Content: 30 became customers.
- **Core ICP from content:** 16 of 76 have a deal and 11 became customers.
- **Governments engage.** JTP: 15.1% qualified by sales, 3.6% with a deal.
- **Offline sources bring buyers** (imports, manual entries, integrations). Content contacts from them: 8.1% with a deal, 55 customers.

What to do next

1. **Ask for job title and company size** on every JTP and content form (required, or a role dropdown), so each lead can be checked against the ICP.
2. **Keep non-ICP contacts away from sales**: route Other, Job seeker and Student (42% of content contacts) to nurture.
3. **Point paid social at the ICP**: it brings 61% of content contacts but fewer than 5 deals, so target corporate innovation and C-level roles and judge it on qualified leads, not downloads.
4. **Score leads with the ICP**: align HubSpot's MQL fit score with the 2024 ICP and fill the empty Persona and Decision Maker Fit fields.
5. **Promote the content that attracts corporates** in corporate campaigns (page 6).

The ICP used (Buyer Persona 2024)

Core ICP: corporates with 10,000+ employees and $100M+ revenue (where known), in an innovation, R&D, digital or C-level role. **Also ICP:** governments and public institutions. **Secondary:** startup founders.

Outcome = Lead Status (SFDC) and deals in HubSpot, not lifecycle stage: 95% of JTP contacts are set to "Sales Qualified Lead", so it doesn't show quality.

Who uses the JTP contact forms

11,881 contacts from 13,395 submissions on 8 JTP forms. Profile = the "Type of profile form" answer.

By type of profile

rates = share of each profile's contacts

Startups are 79% of contacts but rarely become deals (0.12%). Corporates with 10,000+ employees and governments are few, and they convert best.

Type of profile	Contacts		Share	Qualified by sales	Disqualified by sales	With a deal
Corporate, 10,000+ employees ICP		243	2.0%	**17.7%**	47.3%	**5.3%**
Government ICP		384	3.2%	**15.1%**	48.2%	**3.6%**
Corporate, smaller or size unknown		906	7.6%	**6.5%**	55.3%	**1.9%**
Startup 2nd ICP		9,410	79%	1.4%	2.2%	**0.1%**
Investor or VC		471	4.0%	**7.0%**	20.4%	-
University		433	3.6%	3.9%	58.9%	**1.2%**
Student		7	0.1%	0.0%	-	0.0%
Other		26	0.2%	-	0.0%	-
No answer		<5	-	-	-	-
All contacts		**11,881**	**100%**	**2.9%**	**11.4%**	**0.5%**

Green = clearly better than the average for all contacts, wine = clearly worse (groups of 100+ contacts). Disqualified is highest where sales actually reviews the leads, so it shows sales attention as much as lead quality. "<5" = 1 to 4 contacts; "-" = no rate under 5 contacts.

How this was measured

Data. HubSpot read-only pull on 8 Oct 2026; form submissions 1 Oct 2025 – 30 Sep 2026. JTP = 8 JTP contact forms (Startups, Corporates, Governments, Universities, VCs, APAC, All profiles, Contact us). Content = 66 CDW, RFI and resource forms.

Unit. Unique contacts: someone who submitted several times counts once, with the profile and outcome stored on the contact.

Profile. JTP: "Type of profile form". Content: "RFI Type of profile" (or "Type of profile form", then "Ebook Type of Profile" when empty, mainly Japan forms).

Role. From the job title: innovation, R&D or digital; C-level; founder; government; other; empty.

Company size. Employees on the contact, then its company; if empty, the size dropdowns.

Outcome. Lead Status (SFDC): qualified or converted; disqualified. Deal = at least one associated deal. Customer = entered the Customer stage.

Database. All contacts, marketing contacts and engagement: HubSpot searches and the billing page, 8 Oct 2026. "Not engaged" = no open and no click in 12 months, never-engaged included.

Not included. 1,733 submissions on the two "All profiles – dependent fields" forms have no contact record in HubSpot.

GDPR. Aggregated counts only; counts of 1–4 shown as "<5" and rates based on them as "-". No names, emails, companies or record IDs. Raw data was processed in a temporary workspace and deleted. Tables: ICP_vs_Conversions_2026.xlsx.
