JTP / content downloads

● What's flagged

Primary ICP share: corporates with 10,000+ employees are 243 of 11,881 JTP contacts (2.0%) and 853 of 13,385 content downloaders (6.4%).

Content downloads: 5,578 contacts (42%) chose "Other", "Job seeker" or "Student" as their profile.

Paid social: 8,214 of the content download contacts (61%) came from paid social; <5 have a deal and 510 were disqualified by sales. For JTP, 40% of paid social contacts were disqualified (organic search: 9%).

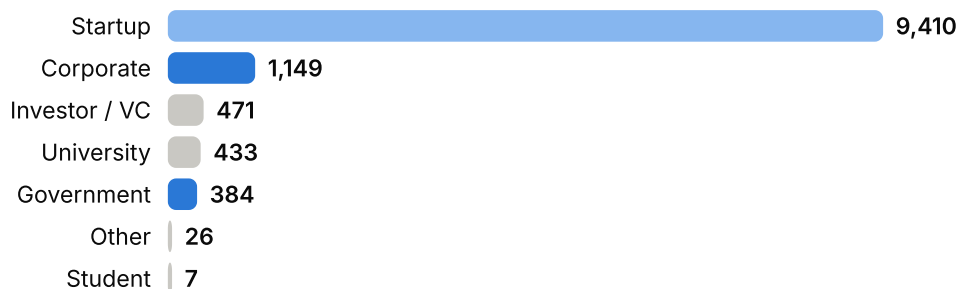

ICP can't be checked for most contacts: the job title is empty for 8,018 JTP and 11,112 content contacts. HubSpot's own "Persona" and "Decision Maker Fit" properties are empty.

Lifecycle stage: 95% of JTP contacts are "Sales Qualified Lead", so it doesn't show lead quality. Lead Status (SFDC) is used instead.

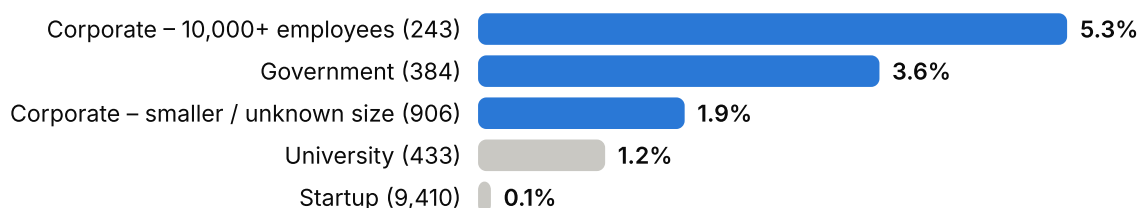

Missing records: 1,733 submissions on the two "All profiles – dependent fields" forms have no contact record in HubSpot.

Who submits the contact forms

Contacts by profile

Share with a deal, by profile

Corporates with 10,000+ employees: 243 contacts, 17.7% qualified by sales and 5.3% with a deal (all JTP contacts: 0.5%).

Startups: 9,410 contacts, 1.4% qualified and 0.12% with a deal. Of these, 2,225 have a founder or C-level title.

Government: 384 contacts, 15.1% qualified and 48.2% disqualified.

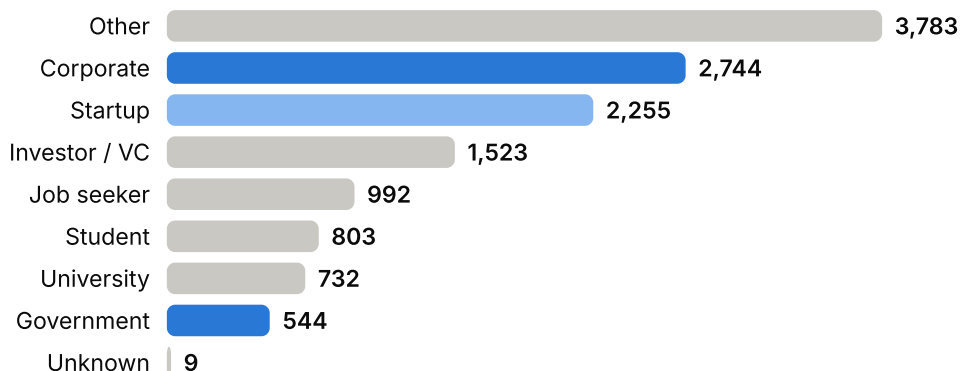

Strict ICP – Corporate (right role + 10,000+ employees): 24 contacts.

% of each asset's contacts. Highest corporate shares: "Humanoid Robotics 2025 Report" and "An Essential Guide to Corporate Innovation".

● Possible next steps

- 1 **Job title and company size:** make job title required (or a dropdown of roles) on JTP and CDW forms, so ICP can be measured.
- 2 **Profile options:** review "Other", "Job seeker" and "Student" on content forms, e.g. route them away from sales follow-up.
- 3 **Paid social lead forms:** review targeting and form questions with the ICP (company size, role), given the disqualification and deal rates.
- 4 **Fit scoring:** align HubSpot's MQL fit score with the 2024 ICP (it rates all JTP startup contacts "Low") and fill the empty Persona / Decision Maker Fit properties.
- 5 **Lifecycle stages:** review why 95% of JTP contacts are set to "Sales Qualified Lead".
- 6 **Missing records:** check why 1,733 submissions on the "All profiles" forms have no contact record.
- 7 **Content:** use the assets with the highest corporate share in corporate-targeted campaigns.

ICP used (Buyer Persona 2024): corporates with 10,000+ employees and \$100M+ revenue (Head of Innovation / R&D / CDO, C-level); governments and public institutions; startups (founders) as secondary.
Outcome: Lead Status (SFDC) and associated deals.

GDPR: aggregated counts only. Counts of 1–4 shown as "<5"; rates based on them as "–". No names, emails, company names or record IDs. Raw data was processed in a temporary workspace and deleted after the analysis. Full method and tables: [PNP_ICP_vs_Conversions.xlsx](#).
