PAID MEDIA · WEEKLY REPORT

5–11 Oct 2026

vs 28 Sep – 4 Oct and the 4 weeks 7 Sep – 4 Oct · USD · data to 12 Oct

Leads rose 16% to 124 at $13.17 each, but paid MQLs halved to 6.

Total spend fell 41% to $1,887 because FR_Alibaba ended on 5 Oct; spend aimed at leads was almost flat (−2%).

Google Performance Max: no spend since 10 Sep.

ChatGPT Ads: nothing ran this week. Test 1 (23 Sep – 2 Oct) spent €229.56 for 43 clicks and no conversions.

What worked

- ✓ **Google Search: cheapest conversions since the 13 Aug rebuild.** 27 at $20.76 each, against 13.9 a week at $75.00 over the 4 weeks before. Spend was flat on last week (−1%).
- ✓ **Meta US prospecting recovered.** 38 leads at $13.05 each (last week 29 at $17.75), led by California and US Middle-South. Top ad: the Quantum Computing video.
- ✓ **EMEA prospecting is still the cheapest source.** 26 leads at $5.47 each (4-week average $6.97).

What to fix

- ! **Leads are not turning into MQLs.** 4.8 paid MQLs per 100 leads (11.2 last week). Paid social fell from 9 to 3 while Direct rose from 12 to 21: check the UTM tags on every ad.
- ! **Google and HubSpot don't match.** Google counted 27 conversions; HubSpot shows 3 MQLs from paid search. Google is meant to count only HubSpot qualified leads since mid-September.
- ! **Western Europe prospecting slowed.** 5 leads at $14.45 for a second week, against 14.5 a week at $6.85 before.

Next week

owner · due

1	Meta: test the Quantum video (PP-196) in US & Canada and Western Europe; move retargeting budget from PP-328 to PP-324.	Felipe + Toco	Wed 15 Oct
2	Google: add the off-topic search terms (page 2) as negatives; move budget from North America to EMEA Startup Collaboration.	Felipe + Toco	Thu 16 Oct
3	Ask Sales Ops for SQLs and MQLs by campaign; agree the restated MQL baseline.	Felipe	Wed 15 Oct
4	Check UTM tags on every ad, and what Google's main conversion counts (browser audit).	Felipe	Fri 17 Oct
5	Western Europe prospecting: check frequency and add new ads.	Felipe + Toco	Fri 17 Oct

Decision needed

At $1,861 a week we end the year at about $303.8k: $3.8k over the $300k budget, $16.2k under the $320k maximum. Landing on $300k needs $1,529 a week, $332 less. Trim, or accept $303.8k?

4.8
paid MQLs per 100 platform leads (11.2 last week)

$183
cost per paid MQL over the last 2 weeks (18 paid MQLs)

MQL table supplied by Felipe on 13 Oct. 28 Sep – 4 Oct restated from 38 to 41 MQLs (CRM sync). SQLs not supplied.

Data notes

- Sources: Meta and Google exports (campaign × day, data to 12 Oct 2026), the Other channels list and the HubSpot numbers in the week's inputs. USD; EUR at 1 EUR = 1.1177 USD.
- Leads: Meta = Results of lead campaigns; Google = Conversions of Search and Performance Max.
- 4-week average = 7 Sep – 4 Oct. Budget as in the spend tracker: pace of the last 3 full weeks (21 Sep – 11 Oct) without ended campaigns.
- No ROAS: revenue isn't tracked by ad source.
- Ad, ad-group and search-term rows: 13 Oct API report, not in the exports, so not re-checked.
- FR_Alibaba last spent on 5 Oct and shows as completed in the 13 Oct export.
- Google's conversion goal changed around 14 Sep (agency notes): its 4-week average mixes two definitions.
